

MARKING GUIDES MATHEMATICS PLE 2023-2024

Do rough work below each question	Show the working steps and final answer in this column
1 Write the following number in words: 12,056,418 (2 marks)	12,056,418: Twelve million, fifty-six thousand, four hundred eighteen.
2) Given the following digit numbers: 8; 0; 5; 7; 2 a) Write the biggest whole number formed by these digits. (1 mark) b) Write the smallest number formed by these digits. (1 mark)	a)87520 b)20578
3) Subtract vertically 4,325,678-2,478,529 = (2 marks)	$\begin{array}{r} 4,325,648 \\ -2,478,529 \\ \hline 1,847,149 \end{array}$
4) Convert 50,000 Frw into USD if 1USD is equal to 1,000 Frw (2 marks)	$50000 \overline{)1000}$ <p style="text-align: right;">50USD</p>

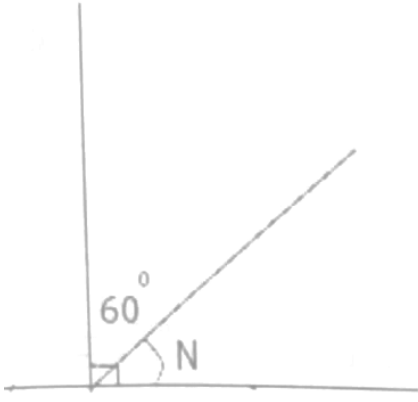

5) Define the term "scale" (2 marks)	Scale: is a set of levels or number which are used in a particular system of measuring things
6) Round off 5.297 to the nearest hundredths. (2 marks)	5.297=5.30
7) Use <, > or = to compare the following: (2 marks) a) $\frac{1}{6}$ <input type="text"/> 0.32 b) 145,700 <input type="text"/> 1457×100	a) $\frac{1}{6}$ <input type="text" value="<"/> 0.32 b) 145,700 <input type="text" value="="/> 1457×100
8) Workout $15a+20ca=.....ca$ (2 marks)	$\begin{array}{r} 150= 1500 ca \\ 20 ca = + 20 ca \\ \hline 1520ca \end{array}$
9) Convert 0.95 into fraction and simplify the answer completely. (2 marks)	$\frac{95}{100} = \frac{19}{20}$

10) Simplify completely $a^3b^2a^4bc =$ (2 marks)	$a^3b^2a^4bc = a^7b^3c$
11) Find the missing two fractions in the sequence $\frac{1}{3}; \frac{1}{6}; \frac{1}{12}; \dots; \dots$ (2 marks)	$\frac{1}{24}; \frac{1}{48}$

12) Work out. a) $(-12) \times (-10) =$ (1 mark) b) $(-20) + (+4) =$ (1 mark)	a) $(-12) \times (-10) = +120$ b) $-20 + 4 = -16$
13) Choose one letter which corresponds with the correct definition of the term "Probability". (2 marks) a) Probability is the chance that an event will less likely happen. b) Probability is the chance that something will happen. c) Probability means that an event will not happen.	a) Probability is the chance that an event will less likely happen.
14) Work out the following: 50 kg + 23 hg =dg (2 marks)	$50\text{kg} = 500,000\text{dg}$ $23\text{kg} = +23,000\text{dg}$ $\underline{\hspace{1.5cm}}$ $523,000\text{dg}$

15) Complete the following sentences with discrete data" or "quantitative data". a) Data with numerical values is called(1 mark) b) The values for numerical data can be whole numbers only. Such data is (1 mark)	a) Quantitative data b) discrete data
16) Share equally 15,000 books among 5 schools. How many books will each school get? (2 marks)	$15000 : 5 = 3000$ books
17) Fill in the missing number: $1\frac{3}{4}$ of 360 is equal to (2 marks)	$\frac{7}{4} \times 360 = 630$ of 360
18) Find the next two numbers in the following sequence 4; 7; 10; ... (2 marks)	4; 7; 10; 13
19) Use quick multiplication to calculate the following: $56 \times 11 =$ (2 marks)	$(56 \times 10) + 56 = 560$ $\begin{array}{r} + 56 \\ \hline 616 \end{array}$

20) Find the value of angle N, if N is the Complementary angle of 60° , (2 marks)	$N = 90^\circ - 60^\circ = 30^\circ$
--	--------------------------------------

	
<p>21) How many poles are required to make a circular fence of 45 m if the poles are 5 m apart? (2 marks)</p>	$\text{Number of poles} = \left[\frac{\text{Circumference}}{\text{Distance between poles}} \right] + 1$ $\text{Number of poles} = \left[\frac{45}{5} \right] + 1$ $\text{Number of poles} = 9 + 1 = 10 \text{ Poles}$
<p>22) If a test started at 8:45 p.m. and ended at 10:45 p.m. How long did the test take? (2 marks)</p>	$\begin{array}{r} 22:45 \\ -20:45 \\ \hline 2\text{hrs} \end{array}$
<p>23) Workout $\frac{3}{4} + \frac{1}{2}$ (2 marks)</p>	$\frac{3+2}{4} = \frac{5}{4} = 1\frac{1}{4}$
<p>24) Find the perimeter of a rectangular garden whose length and width are 15m and 10m respectively (2 marks)</p>	$P = (L + W) \times 2 =$ $(15m + 10m) \times 2 = 25m \times 2 = 50m$
<p>25) Exterior angle of a regular polygon is 72, Calculate its interior angle. (2 marks)</p>	$\text{Interior angle} = 180^\circ - 72^\circ = 108^\circ$
<p>26) Find the Highest Common Factor of numbers 30, 36 and 48. (3 marks)</p>	$\text{HCF} = 2 \times 3 = 6$
<p>27) Find the value of x in the equation $3(x+1)=9$ (3 marks)</p>	$\begin{array}{l} 3x+3=9 \\ 3x=9-3 \\ 3x=6 \\ x=2 \end{array}$
<p>28) If $\frac{3}{4}$ of the pupils in P6 class are girls, find the number of boys who are in class if there are 48 pupils. (3 marks)</p>	$\text{Boys} = 48 \times \frac{3}{4} = 36 \text{ pupils}$

29) A circular garden has a radius of 15 cm. Find its area ($\pi = 3.14$). (3 marks)	$A = R \times R \times \pi = 15\text{cm} \times 15\text{cm} \times 3.14$ $= 706.50\text{cm}^2$
30) Find the volume of a cube whose sides are 7dm. Give the answer in cm^3 (3 marks)	$U = 7\text{dm} \times 7\text{dm} \times 7\text{dm}$ $= 343\text{dm}^3 = 343000\text{cm}^3$

31) Mugabo and Kaliza shared 120,000 Frw in the ratio of 3:5 a) Find their total ratio. (1 mark) b) How much money did Mugabo get? (2 marks) c) How much money did Kaliza get? (2 marks) d) How much more money did Kaliza get than Mugabo (2 marks)	<p>a) $3+5=8$ b) Mugabo= $\frac{3 \times 120000}{8} = 45000\text{Frw}$ c) Kaliza $= \frac{120000 \times 5}{8} = 75000\text{Frw}$ d) Diff=$75000-45000=25000\text{frw}$</p>															
32) A man deposited 100,000 Frw on a fixed saving account that earns 3% simple interest monthly. a) Find the interest earned after 5 years. (4 marks) b) Calculate the total amount on his account (3 marks)	<p>a) $I = \frac{1000000 \times 3 \times 5}{100 \times 12} = 15000\text{Frw}$ b) Amount=$100000+115000\text{FRW}$</p>															
33) Mukamana went to the market and bought the following items: meat, rice and oil. a) Complete the table below. (6 marks)	<p>a)</p> <table border="1" style="width: 100%;"> <thead> <tr> <th>Items</th> <th>Price of each</th> <th>Total expenses</th> </tr> </thead> <tbody> <tr> <td>4kg of meat</td> <td>4,500frw/kg</td> <td>4.800.0</td> </tr> <tr> <td>67kg of rice</td> <td>1400.../kg</td> <td>93, 800frw</td> </tr> <tr> <td>3litres of oil</td> <td>2,500frw/litre</td> <td>7,500frw</td> </tr> <tr> <td colspan="2">Total expenditure</td> <td>44.9300F</td> </tr> </tbody> </table> <p>b) If she had 150,000Frw. How much did she save? (1 mark)</p> <p>b) $150000-119300\text{f} = 30700 \text{ F}$</p>	Items	Price of each	Total expenses	4kg of meat	4,500frw/kg	4.800.0	67kg of rice	1400... /kg	93, 800frw	3litres of oil	2,500frw/litre	7,500frw	Total expenditure		44.9300F
Items	Price of each	Total expenses														
4kg of meat	4,500frw/kg	4.800.0														
67kg of rice	1400... /kg	93, 800frw														
3litres of oil	2,500frw/litre	7,500frw														
Total expenditure		44.9300F														

35) Study the diagram below which shows marks scored by learners in French test out of 100.

- How many learners did the test? **(1 mark)**
- How many learners got the same marks? **(1 mark)**
- Write the names of learners who got the same marks. **(1 mark)**
- How many learners got less than 50% marks? **(1 mark)**
- Name the learner who got the highest marks? **(1 mark)**
- Name the learner who got the lowest marks? **(1 mark)**
- Write the marks obtained from the lowest to the highest? **(1 mark)**

- 7 learners
- 2 learners
- munezero and Kruijena
- 3 learners
- Suzana
- karoli
- $80-10=70$ marks
